NAI TEMPLATE STATE PRIVACY LAW PROCESSING ADDENDUM TEXT

1. Introduction

This State Privacy Law Processing Addendum (this “**Addendum**”) is entered into between the parties identified in the relevant signature blocks below (each a “**Party**” and collectively the “**Parties**”). This Addendum sets forth the terms under State Privacy Laws pursuant to which a Party (the “**Disclosing Party**”) may transmit, disclose, or otherwise make available Personal Data to the other Party (the “**Receiving Party**”) for Advertising Purposes (defined below). This Addendum supplements and forms part of any existing, current, or future agreement between Disclosing Party and Receiving Party pursuant to which Disclosing Party discloses Personal Data to Receiving Party (any such agreement being individually or together referred to as the “**Agreement**”). This Addendum will be effective as of the effective date of the Agreement (“**Effective Date**”); provided, however, the relevant obligations apply only to the extent (i) Personal Data is subject to the State Privacy Laws; and (ii) a State Privacy Law has taken effect.

2. Definitions. For purposes of this Addendum, the following terms will have the meaning ascribed below:

- 2.1. “**Advertising Purposes**” means all Restricted Purposes in addition to (i) activities that constitute Targeted Advertising or Cross-Context Behavioral Advertising under State Privacy Laws, including any processing that involves displaying ads to a Consumer that are selected based on the Consumer’s cross-context behaviors, (ii) creating or supplementing user profiles for such purposes.
- 2.2. “**CCPA**” means the California Consumer Privacy Act of 2018, as amended, including as amended by the California Privacy Rights Act of 2020, and any regulations promulgated thereunder.
- 2.3. “**Data Breach**” means “breach of the security of the system,” “security breach,” “breach of security,” “breach of system security,” and other analogous terms referenced in State Privacy Laws.
- 2.4. “**Joint Processor**” means a Processor engaged by one or more Controllers to Process Personal Data in a manner that requires combining Personal Data collected across such Businesses, such as for certain measurement activities or capping the frequency of ads shown to a Consumer across sites or services not owned or controlled by the same Business.
- 2.5. “**Restricted Processing**” means Processing only for Restricted Purposes.
- 2.6. “**Restricted Processing Signal**” means any flag or signal indicating that a Consumer has opted out of the Sale, Sharing, or Processing for purposes of Targeted Advertising of their Personal Data, including without limitation those flags or signals sent through the IAB CCPA Compliance Framework, Global Privacy Platform, or other signaling system agreed to by the Parties.
- 2.7. “**Restricted Purposes**” means advertising-related Processing that qualifies as a Business Purpose, including Processing for purposes of auditing; security and

Commented [1]: This definition is intended to set forth processing purposes that will generally be permissible for processors under all the state laws. The “only to the extent” language at the end can be removed if the parties wish, but is intended to ensure that processors don’t go beyond what’s permitted for processors in the event a regulator interprets the law to foreclose certain activities for processors. For example, it is presently unclear whether processors may combine data sets for any purposes in CA, and different entities are taking different positions on, e.g. frequency capping and measurement. The “only to the extent...” language is intended to provide some flexibility for the parties to pivot if needed, without renegotiating their entire contract.

integrity; debugging; short term, transient uses; analytics; providing advertising or marketing services that do not include Cross-Contextual Behavioral Advertising, Targeted Advertising, or profiling; internal research; and efforts to improve quality and safety. Restricted Purposes includes first-party advertising, contextual advertising, frequency capping, measurement, fraud detection and prevention, and ensuring and measuring viewability, each only to the extent such activity (i) is permissible for a Processor to perform under the applicable State Privacy Laws; and (ii) does not result in a Sale or Sharing of Personal Data or constitute Processing of Personal Data for Targeted Advertising purposes.

- 2.8. **"State Privacy Laws"** means the CCPA, the Colorado Privacy Act, the Connecticut Act Concerning Personal Data Privacy and Online Monitoring of 2022, the Utah Consumer Privacy Act of 2022, and the Virginia Consumer Data Protection Act, in each case as amended and including any regulations promulgated thereunder.
- 2.9. **"Business," "Business Purpose," "Commercial Purpose," "Consumer," "Controller," "Cross-Context Behavioral Advertising," "Deidentified," "Deidentified Data," "Personal Data," "Personal Information," "Process(-ing)" "Processor," "Sale," "Sell," "Service Provider," "Share," "Targeted Advertising"** and **"Third Party"** shall have the meanings ascribed to them in State Privacy Laws.
- 2.10. References in this Addendum to **"Controller," "Personal Data,"** and **"Processor"** include **"Business," "Personal Information,"** and **"Service Provider"** respectively.
3. **Roles.** With respect to the Processing of Personal Data, each Party acts as a Controller, unless a Restricted Processing Signal is present, in which case Receiving Party acts as a Processor and Processes the Personal Data on behalf of Disclosing Party (which may operate as either the Controller or a Processor to another Controller).
